

WHO IS GOD AND WHAT IS GOD?

GOD, OUR MODEL

In Genesis 1:1 we read, “In the beginning God created the heavens and the earth.”

He is creating things with words, “calling things” and repositioning things using the power of his words. Now for us to understand God as our model for a life of abundance here on earth, we need to understand who God is, and who He is not. We cannot understand the supernatural unless we understand where it originates from and how we can properly apply it in the “now.”

Firstly, we know that according to Numbers 23:19...

GOD IS NOT A MAN. PERIOD.

Secondly, we read in Exodus 3:14, during a dialogue with Moses, God refers to Himself as “I AM”. What does this tell us about God?

He IS the self-existent one that doesn't need anything or anybody to exist. God is the one that created everything and doesn't need you, or me, or anything to continue to exist.

So God is not a man...

NOW THE PROBLEM IS, MOST PEOPLE ACKNOWLEDGE THAT GOD IS GOD, BUT ACT AS THOUGH HE WERE A MAN. WHEN WE DO THIS, WHEN WE BELIEVE GOD IS A MAN, WE APPLY ALL THE LAWS THAT APPLY TO US (SPACE, TIME, LIMITATIONS) TO GOD.

Without the supernatural, we are bound to time, distance and the laws of nature. But if we believe God to be the great “I AM” then this means that none of the natural laws apply to Him. When we think God is a man, we put limits on what He can do in our minds, leading us to think thoughts such as “it's going to take too long,” or “that could never happen,” because subconsciously we are binding God to these human laws.

For example, you sign a contract with the bank that you are going to pay off your bond in 30 years' time, that's the law OR you can choose to believe that your God can operate outside of those laws, paying off your bond in 10 years, 5 years or 30 days! God can pay off that bond right now!

God doesn't exist in the realm of the natural. He exists in the Spirit realm or the supernatural.

It's another dimension which cannot be measured in distance.

“Supernatural” by definition is, “a manifestation or event attributed to some force beyond scientific understanding or the laws of nature. (Oxford Languages)

When we break it up, “super” refers to “above and beyond” and “natural” refers to creation or nature. Therefore, “supernatural” can be defined as above and beyond the natural world.

SO GOD IS TRULY ABOVE AND BEYOND.

Above and beyond science
Above and beyond reason
Above and beyond the laws of nature
Above and beyond education
Above and beyond doctors reports

When you move into the supernatural realm, things are accelerated. This practically means things that would normally take years to do in the natural, can be accelerated in the spirit when we do them God's way.

The natural, on the other hand, is the supernatural deaccelerated.
