Flexographic Printing

- Self Adhesive Labels (PSL)
- Shrink Sleeves
- Wrap Around Labels
- Flexible Packaging (*smaller SKU's*)
- Speciality Packaging:
 - *Peel-and-read*
 - *Promotional coding*
 - *Reverse printing*
 - *Tamper proof labelling*
 - *Counterfeit label solutions*
 - *Blister Packs*
 - *Tags*

Rotogravure Printing

- Flexible Packaging
- Multi-layer substrates and laminates
- Solvent-less and Solvent-based laminations
- Ready-made pouches and bags
- Pharmaceutical flexibles
- Cold Seal

Project Development

Innovation that is
Feasible and Achievable

Global and Local Challenges

- High Freight Costs
- Port Congestion
- ROE Volatility
- Long Lead Times
- Larger MOQ's
- Energy and Water Crisis

Mitigation and Contingency: Investment in Infrastructure and Plant

- Multi-site operations national and internationally positioned.
- Within secure gated business parks.
- Energy: Sites powered by back-up generators.
- Water: Water management systems.

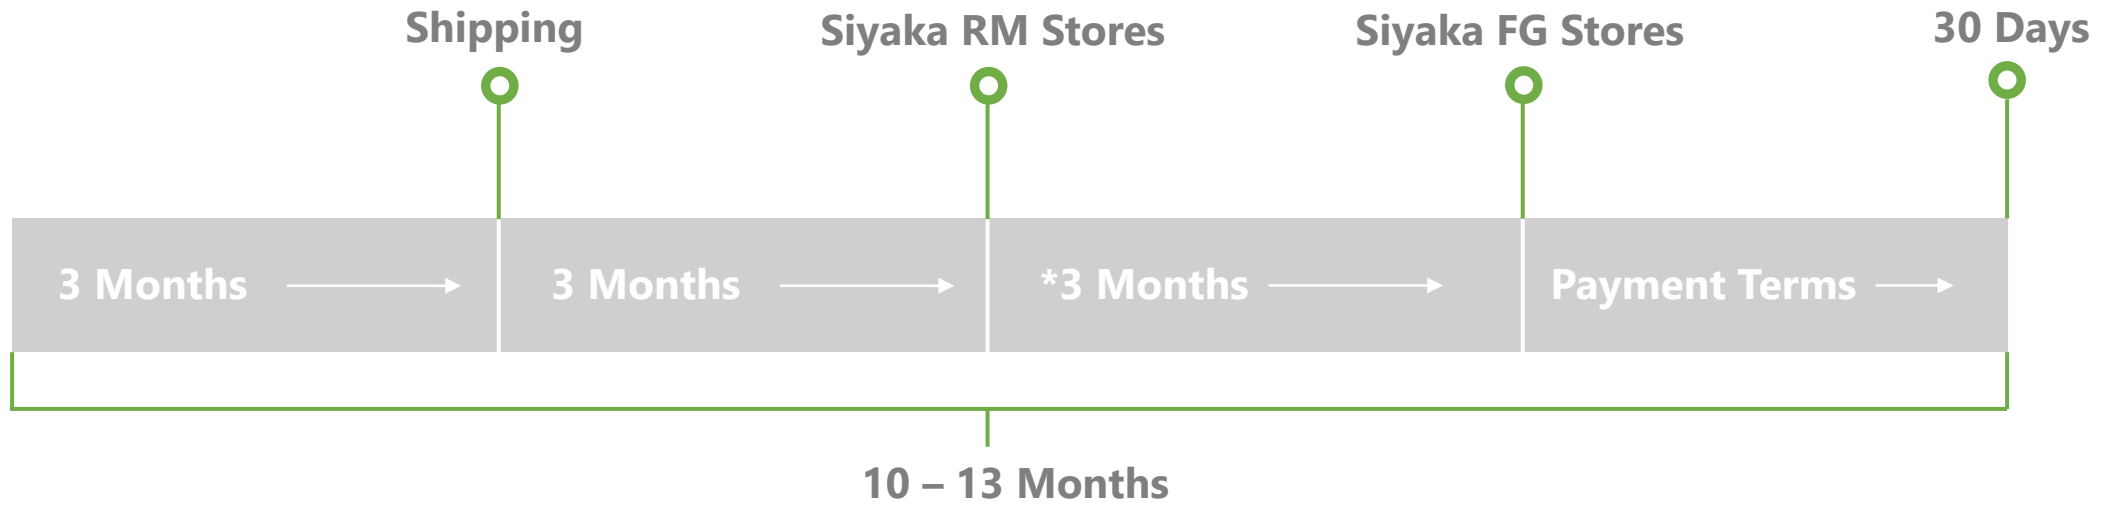

Strategic Procurement

To combat current challenges and turbulent markets ahead, we have strategically restructured our procurement forward-planning, strengthened by our warehousing and new equipment investment.

Our clients benefit the following:

- Larger volume material cycle available
- Pre-booked campaign slots
- Wide range of Substrate to suite specialized application
- Holding of bulk width material and slit to customer requirement on demand
- In-house slitting of raw material offering flexibility that is not restricted by market availability
- Large volume specialized inks stored in temperature-controlled environments

Procurement, Packaging and Brand Managers will benefit our total solution offering, designed for swift mobilization of Power Brands and transcending markets.

- Innovation of new printing technology resulting in specialized white laydowns
- High-definition print resolution
- Chemically engineered formulation to ensure high speed application resulting in more labels applied in a shift, therefore increased production capacity without having to invest in additional equipment.
- With customized machinery and tooling this offers product variety.

100% Recycle Film – High Barrier MDO- PE Film

What is High Barrier MDO-PE Film?

High barrier MDO-PE film means the MDO-PE film with high barrier treatment. The barrier film function will protect your products from oxygen and moisture; and maintain in good quality after long time storage on shelf.

Normally there are 2 types of high barrier MDO-PE films:

Barrier Coating MDO-PE film

Metalized MDO-PE film

The final OTR and WVTR for the laminated PE film:

OTR: 0.5 – 2

WVTR: 0.8 – 3.5

100% Recycle Film – High Barrier MDO- PE Film

Advantages of High Barrier MDO-PE Film

- ✓ **High Barrier Function**
- ✓ **100% Recyclable for laminated Mono Material PE pouches**
- ✓ **Transparent**
- ✓ **Excellent Printability**
- ✓ **Outstanding Optical Properties**
- ✓ **High Pressure Resistance**

100% Recycle Film – High Barrier MDO- PE Film

Applications:

High Barrier MDO-PE is the perfect material to replace foil and Metalized PET. When it laminated to PE film, it can be used to make all kinds of bags, such as:

100% recyclable mono-material stand up pouches

100% recyclable mono-material spout pouches

100% recyclable mono-material flat bottom pouches

100% recyclable mono-material shaped pouches

100% recyclable mono-material rollstock

100% recyclable mono-material side gusset bags
